Hi Leah,

Only very limited PFAS data in EQulS for WDE. Just results from "Effluent", no monitoring well samples. One sample event from June 2006 and one from June 2012

Mark

Actually now I remember that I did need the PFAS data for Washington County, for something different. Sorry for the glitch.

For WDE, Lauren said there is no PFAS data during the last five years. Unless you have some reason to think we missed something, I'm done asking about PFAS for now I think!

Good morning Leah,

You had asked for the PFAS data for Washington County not WDE.

Mark

The location names on the PFAS spreadsheet - don't match the monitoring well names at WDE. Am I missing something? Here's the map of monitoring wells. Maybe the data came from residential wells that aren't on the map?

Hi Leah,

Here's a table of the PFAS results from the monitoring wells at the Washington County Closed Landfill. I ran the dates from Mid-2015 to now.

Please let me know if you need any additional information,

Mark, don't know if you got a request directly from Leah or not. But she would like WashCo gw PFAS data.

Can you send me an excel spreadsheet of recent PFAS/PFC results for Washington County Landfill monitoring wells? (I don't know how frequently they are sampled for, so whatever you think makes sense works for me, e.g., last couple sampling rounds? EPA HQ is tracking ranges that are present at various NPL sites and wants an update.

Any time before the end of March works I think. I already gave them what we had in the 2014 FYR but that's pretty old now.

Thanks!
Leah
